Annual Supplier Risk Report

The annual review covered 214 suppliers across four regions and three business lines.

Suppliers in the critical tier received an on-site assessment and a control test.

The review was coordinated by Ingrid Haugen, who can be reached on +47 2255 0187 about the findings.

Seven suppliers had open findings at year end, two of them rated high.

Remediation is tracked by Tomasz Zieliński (t.zielinski@example.com) every month.

Contract clauses were updated for data residency and breach notification.

The next cycle starts in January and adds a review of fourth parties.

Questions about the method go to the supplier risk mailbox.
